Re: Phase out of 13 SEER Variable Speed 2 ton Package Heat Pumps - Premium

NORDYNE'S line of 14 SEER, package heat pumps are now in full production in 2-5 ton models. Therefore, it is no longer necessary to maintain the 13 SEER, 2 ton, 2-Stage, variable speed package heat pump in the product offering. In April of this year we phased out the production of the 3-5 ton, 13 SEER models with the introduction of the 14 SEER package heat pumps in 3-5 tons. Please place your final orders for the 2 ton 13 SEER package heat pumps by November 1, 2007. Below is the list of models and SKUs that will be removed from the product offering and the new 14 SEER information:

Package Heat Pumps

13 SEER		14 SEER	
Old Model	Old SKU	New Model	New SKU
Q4SD-X24K	918517H	Q4SE-X24K	919340

If you have any questions or require further assistance, please contact your RSM.
