 RE: Tax Credit Update - Split Heat Pumps

ROUTE TO:	✓ SEEN	No. of Copies Distributed

NORDYNE is pleased to announce that the *T4BF-048KA when matched with the appropriate NORDYNE Furnace, now qualifies for the Federal Tax Credit requirements. NORDYNE has verified the performance testing on the 4 ton 16 SEER Heat pump and has provided updated ratings to AHRI. All existing inventory will enjoy this re-rate.

The table below indicates the current performance relative to heat pumps and the tax credit requirements. A “Green” check indicates satisfactory performance and a “red” X indicates that additional work is required.

Model	Current Performance (SEER/EER/HSPF)	
	Air Handler	Furnace
*T4BF-024KA	✓	✓
*T4BF-036KA	✓	✓
*T4BF-048KA	✓	✓
*T4BF-060KA	✓	✓
*T4BE-018K	✓	✓
*T4BE-024K	✓	✓
*T4BE-030K	✓	✓
*T4BE-036K	✓	✓
*T4BE-042K	✓	✓
*T4BE-048K	Utilize BF	Utilize BF
*T4BE-060K	Utilize BF	Utilize BF

See AHRI directory for official ratings and matches.

The *T4BE series of equipment (1.5 thru 3.5 tons) when matched with NORDYNE’s indoor products achieve the tax credit performance requirements, and we recommend utilizing the BF series of equipment for the 4 and 5 ton applications.

If you have any questions or require further assistance, please contact your RSM.
